TrioTech Recruitment,
Munich, Bavaria, Germany.

Dear Tech Recruiter,

I am writing to express my keen interest in the Senior PHP Developer role at TrioTech Recruitment. With 7+ years of experience in PHP development and a robust understanding of the Symfony framework, I am confident in my ability to make a meaningful contribution to your team and drive success.

I am a humble and curious humanistic individual with a passion for learning and teaching. These soft skills, combined with my technical expertise, have driven me to succeed in the software development industry thus far. Throughout my career, I have worked with startups, small, medium, and large-scale companies, which has honed my ability to adapt to different environments and understand the bigger picture.

I bring a wealth of experience working with clients from various countries, such as France, Australia, the United States, India, and Sri Lanka, each with unique domains and cultures. The roles I have held in the past, including Team Lead, QA Engineer, Automation Test Writer, and Support Engineer, have made me a seasoned player in the industry.

Additionally, I have a strong background in PHP development, with proficiency in various architectures, frameworks, and best practices. I am experienced in writing clean code, practicing a TDD approach, utilizing Jenkins continuous integration, and delivering quality code with tools such as PHPCS, PHPMD, Sonarqube, PHPUnit, and Robot Framework. My hands-on experience with frontend frameworks further makes me a strong candidate for this role.

I am a fluent English speaker and hold a Bachelor of Information Technology degree from the University of Colombo Sri Lanka, as well as Java certifications. Over the past decade, I have honed my skills working with Linux distributions, further enhancing my qualifications for this role.

I am eager to discuss my qualifications further and demonstrate how I can contribute to your team as a Senior PHP Developer.

Thank you for your consideration.

Best Regards,

Viraj Amarasinghe
Senior Software Engineer
